EXPERIMENT 04

REDESIGN PROJECT

Discovery > Define > Design > Implement > Test

AIM

To select a product from a given domain and redesign it by following the complete design lifecycle: Discovery, Define, Design (Implement) and Testing (Usability).

SUBJECT

StudyNest

Online Learning Platform / Web + App redesign

DESIGN LIFECYCLE

01
DISCOVERY
Interviews, survey and competitor audit. See screen 2.

02
DEFINE
Insights, problem statement and HMW questions. See screen 2.

03
DESIGN
User flow, wireframes and hi-fi screens. See screen 3.

04
IMPLEMENT
Interactive prototype in two iterations. See screen 3.

05
TEST
Usability test, SUS score and fixes. See screen 4.

DISCOVER // DEFINE // DESIGN // IMPLEMENT // TEST // ITERATE

DISCOVERY + DEFINE

01 DISCOVERY

8
user interviews with students

40
survey responses collected

3
competitor platforms audited

H1-H10
heuristic audit of current portal

KEY INSIGHTS

'I never know which lesson to open next.'

'Deadlines are buried in three different tabs.'

'Quizzes feel disconnected from the videos.'

02 DEFINE

PRIMARY USER

Meera, 19

2nd-year engineering student. Studies on a laptop at night, juggles 3-4 courses and wants to see progress at a glance.

PROBLEM STATEMENT

Students lose track of their progress across courses because the dashboard never shows what to do next.

HOW MIGHT WE

...surface the next lesson the moment a student logs in?

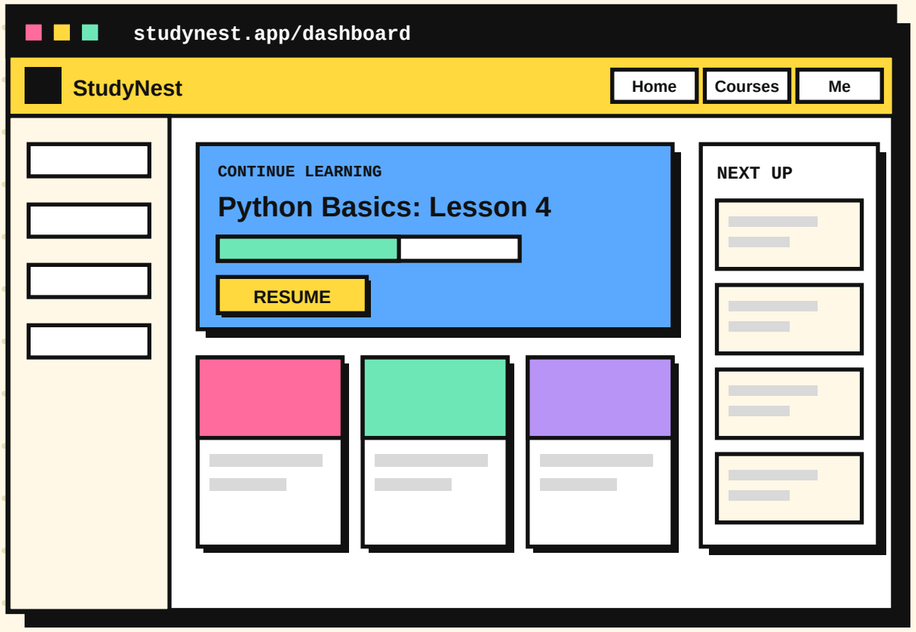

...gather every deadline into one place?

...link each quiz directly to its video lesson?

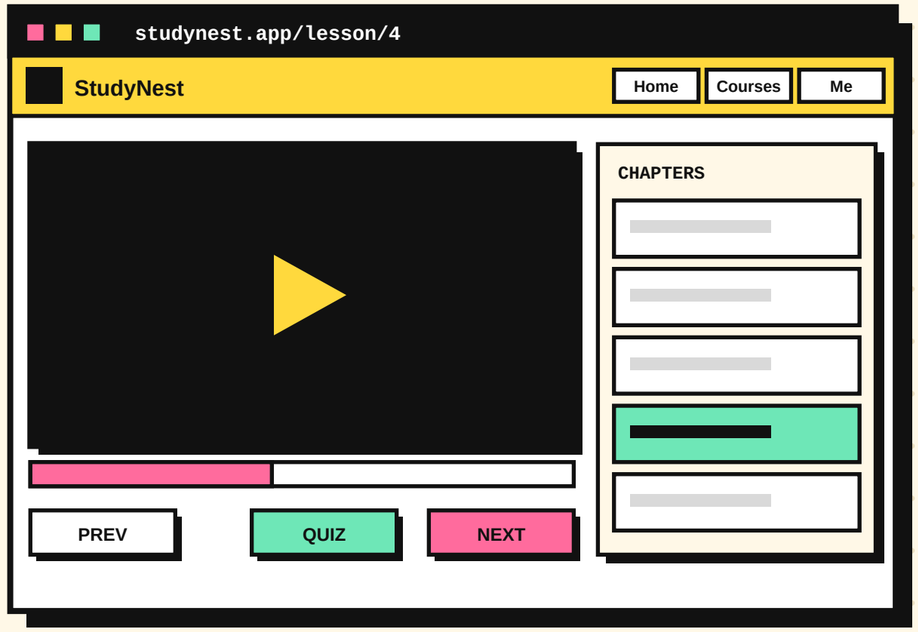

DESIGN + IMPLEMENT

USER FLOW

HOME → COURSE → LESSON → QUIZ → PROGRESS

WIREFRAME A / DASHBOARD

WIREFRAME B / LESSON VIEW

IMPLEMENT

- Hi-fi prototype in Figma
- 8-pt grid, 12-column layout
- Reusable component set
- Iteration 1 and 2 after testing

DESIGN TOKENS

Ink	Yellow	Pink	Blue	Mint
#111111	#FFD93D	#FF6B9D	#5AA9FF	#6EE7B7

Aa — Bold sans headings, mono for labels, 3px borders, hard 8px shadows.

USABILITY TESTING

TEST PLAN

- 5 student participants
- 4 tasks: next lesson, join quiz, check deadline, view progress
- Think-aloud, on a laptop, 30 min each
- Metrics: completion, time, errors, SUS

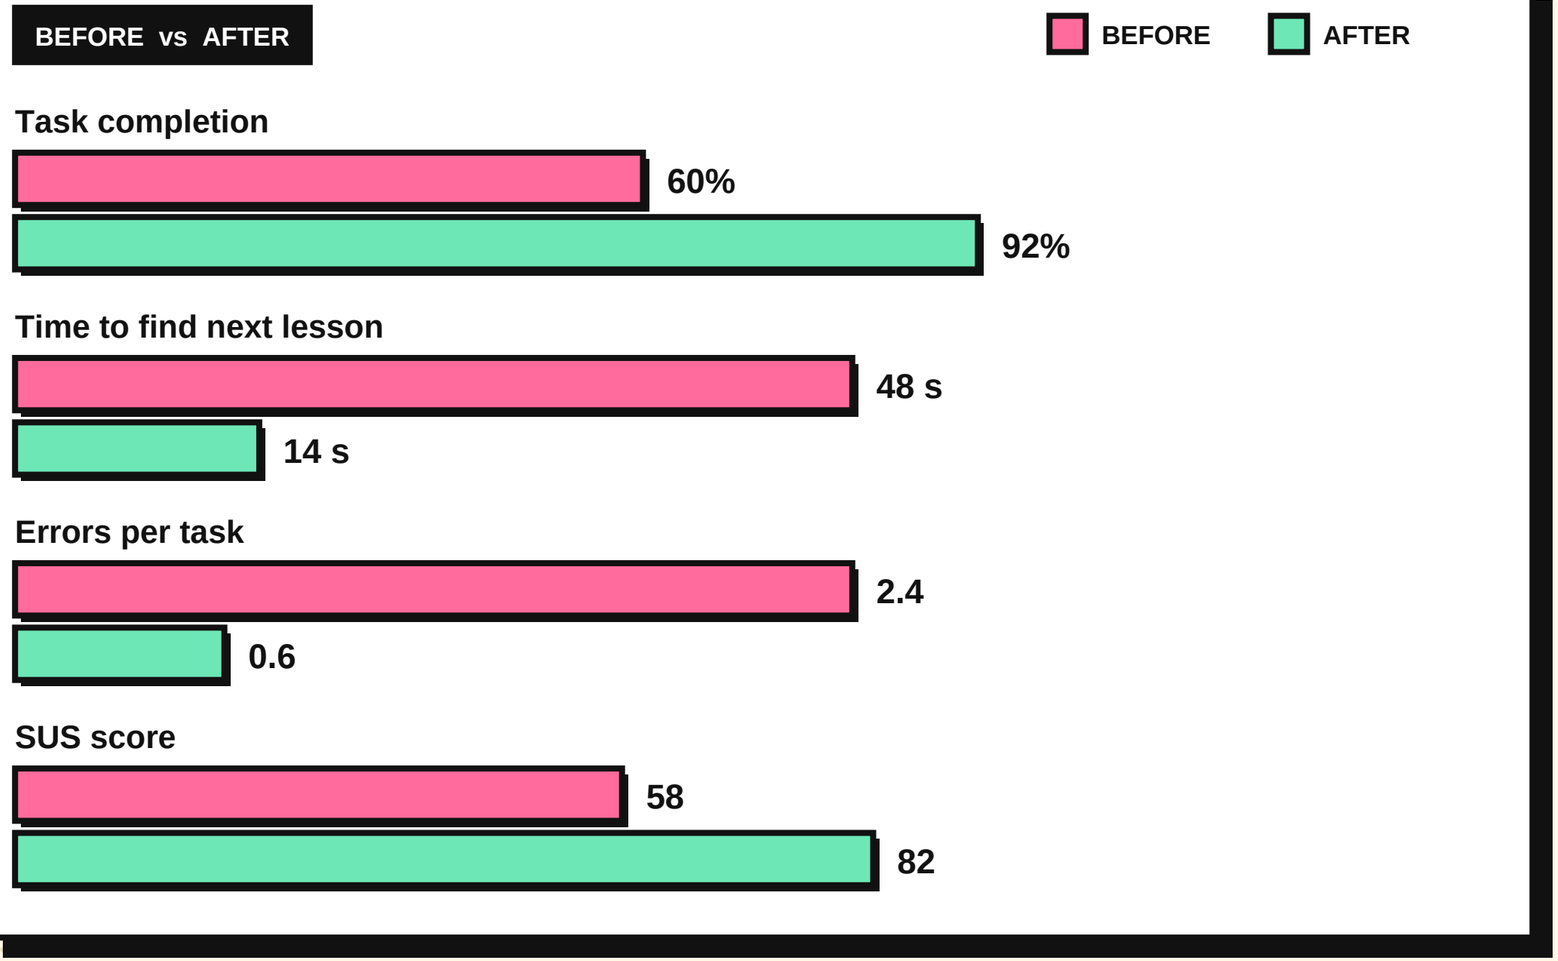

ITERATION 1

Moved the Resume card to the top and labelled every icon.

ITERATION 2

Merged deadlines into one strip and linked each quiz below its video.

BEFORE vs AFTER

RESULT The StudyNest redesign was carried out through Discovery, Define, Design, Implement and Testing. After two iterations, task completion rose from 60% to 92% and the SUS score from 58 to 82.
